

Guidelines

Your focus in Phase 1 is to make sure you are getting the right amount of Modulen™ and eating all of the mandatory foods each day.

MODULEN™

In Phase 1, Modulen™ will make up half of your daily energy intake (50% of your calorie goal). You can find your recommended number of Modulen™ servings per day on the home screen.

Try mixing Modulen™ into smoothies, eating with Modulife diet friendly cereals, or adding to other recipes to change up the flavor. Check out the recipes section for ideas!

MANDATORY FOODS

In addition to Modulen™, there are five other foods that you are required to consume in specific amounts each day:

- Fresh chicken breast – 5-7 oz/day
- Eggs – 2 per day
- Bananas – 2 per day
- Apple – 1 per day (peeled)
- Fresh potatoes – 2 per day (peeled, cooked, cooled), not to be consumed at the same meal

Incorporate these foods into your diet in a variety of ways to keep things interesting. Refer to the recipes section for ideas!

TIPS

Since your selection of foods will be limited in Phase 1, it is important to get creative with mandatory and other allowed foods! Make use of allowed herbs, spices and oils, as well as different cooking methods to change the flavors and diversify your options during this phase.

It is important to follow these guidelines closely for the duration of this phase so that you can feel your best by the end of the 6 weeks.

And remember – this is the strictest phase of the diet. It is only 6 weeks, and it will only get easier from here on out!
